to discuss your dryer needs.

Beauty and Function in One - Dryer Wall Vent™

Pest Proof Vent and Improved Airflow in One - Dryer Wall Vent™

Dryer Wall Vent is an attractive and functional part of your dryer venting system. Made of steel and powder coated in three great colors, Dryer Wall Vent has been designed to provide zero airflow restriction to the dryer. And the self closing door inside of the metal frame deters woodland creatures from entering.

Designed for years of use, requires minimal maintenance and can enhance the performance of your dryer by limiting airflow back pressure. Can be retro-fit into most dryer vent installations to add beauty and protection to the dryer venting.

Available in White, Tan or Brown, call today to see if Dryer Wall Vent is something that can improve the performance of your dryers ducting.
