Dryer Tech

Your local, professional dryer everything expert. I know all things related to your clothes dryer.

CALL (503) 746-9580
to discuss your dryer needs.

Not all Roof Jacks are the Same

There are Roof Jacks, and then there is DryerJack™

DryerJack is the only product on the market designed specifically for your dryer vent.

Made of 26 gauge metal and tuned to provide no airflow resistance to your dryer, DryerJack keeps the weather out, while allowing your dryer to breath properly.

Designed to meet or exceed any and all building codes, this is the one roof jack that will last the life of the roof, and then some.

Proudly made in the USA, DryerJack is the only dryer vent cover I personally recommend and install for my customers.

Don't settle for universal roof vents on your home. Insist on the one product designed for your dryer, resists lint buildup, and looks good too.
